

INNOVATIVE ANALYTICAL & AUTOMATION SOLUTIONS FOR THE DAIRY INDUSTRY

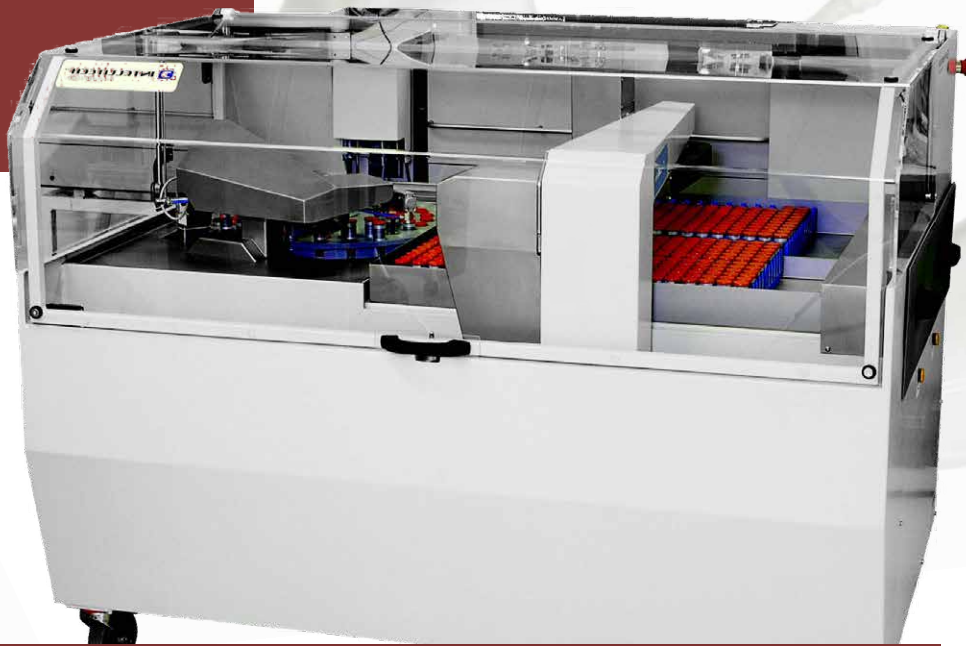

BENTLEY INSTRUMENTS

AUTOMATION SYSTEMS FOR MILK ANALYZERS

ILAS 3000 ROBOT

AUTOMATION FOR COMBINED SYSTEM

- Analytical chain standardization
- Up to 600 samples/hour
- Productivity gain
- Operational costs optimization
- MSDs Reduction

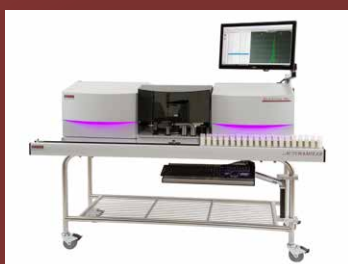

Compatible with
FTS Combi
and alternative methods

ILAS 4000 ROBOT

AUTOMATION FOR BACTERIA COUNTER

- Analytical chain standardization
- Up to 200 samples/hour
- Refrigerated environment for optimal samples preservation
- Productivity gain
- Operational costs optimization
- MSDs Reduction

Compatible with
BactoCount IBC 3.0
and alternative methods

EXCLUSIVE DISTRIBUTOR OF

INTELLITECH
AUTOMATION

INNOVATIVE ANALYTICAL & AUTOMATION SOLUTIONS FOR THE DAIRY INDUSTRY

BENTLEY INSTRUMENTS

AUTOMATION SYSTEMS FOR LABORATORIES

SORTER ROBOT

SAMPLES SORTING AUTOMATION

- Sorting up to 6 different criteria
- Up to 2400 vials/hour
- Refrigerated environment for optimal samples preservation
- Productivity/operational costs gain
- MSDs Reduction

STANDARDIZED TRAYS & SORTER APP

- Robust pad, long battery life, and designed for field use
- Integrated RFID readers and barcodes
- Scalable and fully customizable application based on desired data

CAPPER ROBOT

AUTOMATION FOR SAMPLE VIALS PREPARATION

- Vials preparation standardization
- Up to 2500 vials/hour
- Operational costs optimization
- Productivity gain
- MSDs Reduction

ABOUT BENTLEY INSTRUMENTS...

For more than 35 years, Bentley Instruments specializes in the design and development of analytical solutions for the optimal valorization of milk and dairy products. We also offer solutions for the milk analyzers and laboratories automation to ensure complete methods standardization as well as a systematic and optimized analytical evaluation of each sample. The goal of this new holistic approach is to provide new tools for the optimal qualitative and economic valorization of your production processes or herds management.
